**N+ORDIK**

The finnish company Kiilto has a history of more than a century and targets up to 2080. They have their own research and development department in four chemical business areas: construction products, industrial adhesives and refractories, professional hygiene and consumer goods.

Kiilto owns the Plum skin care sector, and the Antibac and Dax brands.

PLUM skin care and hand hygiene is a Danish brand owned by the finnish Kiilto, which has been manufacturing Scandinavia's leading skin care, hand hygiene and industrial hand cleaning solutions for over 50 years in close cooperation with dermatologists, health centres and occupational safety consultants.

Danish ABENA offers more than 38 000 innovative and proven quality products in the fields of healthcare, medical and catering products, cleaning and waste management solutions. ABENA aims to develop solutions that are environmentally friendly and sustainable for society.

The hungarian DWA brand's medical range covers the entire spectrum of wipes used in healthcare. From patient care wipes to alcohol and non-alcohol skin and surface disinfectants and products for disinfecting medical devices.

Soap-In-A-Box is the brand of the danish Modern Hotel Cosmetics (MoHoCo), which produces premium products specifically for the HoReCa sector. The Soap-In-A-Box dispenser concept combines elegance and efficiency while being skin and environmentally friendly.

# Practical solutions

---

Plum is a brand of hygiene products for the professional market. With more than 50 years' experience in the field of hygiene we have developed a product range that makes it easy to maintain proper hygiene within different kinds of workplaces. This applies to hand hygiene as well as the cleaning and disinfecting of surfaces.

All our products and solutions have been developed based on a thorough knowledge of the industries we serve and meet the requirements and needs of the industrial, food and healthcare sectors.

# Environmentally friendly products

---

We place great emphasis on ensuring that our products and packaging are a good choice for both the customer and the environment. We hold ISO 14001 environmental certification and we work continuously to reduce the environmental impact of our raw materials, packaging, production and transport.

## Dispensers for the environment

We provide hygienic dispensers and packaging that provide the correct chemical dosage, can be emptied completely, and generate a minimum amount of waste.

Our solutions are easy to use during busy working days and you can always find an option that is appropriate for your particular workplace.

## The Nordic Swan Ecolabel

Products bearing the Nordic Ecolabel represent a large and increasing proportion of the Plum range. The Nordic Ecolabel makes it easy to identify the most environmentally friendly products.

When choosing products bearing the Nordic Ecolabel, you are protecting nature and the environment, taking care of yourself and your loved ones, using less of the Earth's resources and showing consideration for the future of our planet. Better for the environment. Better for you.

# Skin protection before work

Apply a protective cream before starting work! This will help prepare your skin for protection against the various exposures during work.

They prevent dirt from penetrating the skin, so you need fewer and milder cleansers to clean properly.

## Pre-work protective creams

<b>Plutect Dual</b>  Combined protective cream with conditioning effect		<b>Packaging</b> 100 ml tube 0.7 l bag-in-box	<b>Article NO.</b> 2541 2503	Skin care cream with protective with double effect. For use before and during work with both water-based and oil-based substances. Perfume-, dye- and paraben-free. Nordic Swan eco-labelled.
<b>Sun Cream SPF 30</b>  Sun protection cream		<b>Packaging</b> SPF 30 200 ml tube	<b>Article NO.</b> 3022	Waterproof and unperfumed sun cream with medium / high protection. Protects the skin against UVA and UVB rays. Suitable for use on the whole body. Ideal for workplaces where work is done outdoors. Perfume-, dye- and paraben-free. Nordic Swan eco-labelled.

# Hand wash

To keep skin healthy, it must be kept clean – every day. Skin cleaning and frequent handwashing can damage the skin, so it is important to choose a mild and skin-friendly soap. All our soaps have a pH value close to the skin's natural levels and contain ingredients with a regenerating effect that minimise skin drying.

We provide soap with and without perfume, soap for regular and frequent handwashing, and soap that is especially designed for the whole body. The one thing they all have in common is that they are extremely mild and effective.

## Soaps, shower gels

<b>Plum No. 14</b>  Industrial soap for general cleaning with colour, fragrance		<b>Packaging</b> <b>Article NO.</b> 1400 ml bag-in-box    1413	Effective industrial soap for general hand wash with gentle effect with colour and perfume. Does not contain abrasives. In combination with a protective cream, it can replace aggressive hand cleaners containing abrasives in many workplaces. Recommended for regular hand washing in washrooms, offices, public institutions.
<b>Daily</b>  Environmentally friendly colour- and perfume-free cream soap		<b>Packaging</b> <b>Article NO.</b> 1400 ml bag-in-box    1795	High-quality, environmentally friendly, skin-friendly, anti-allergen, colour- and perfume- and paraben-free cream soap. One of Plum's highest quality products, gentle on your hands and the environment. Nordic Swan eco-labelled. Especially recommended for people with sensitive skin or where frequent hand washing is required e.g. healthcare.
<b>Fresh Hair &amp; Body</b>  Environmentally friendly, hypoallergenic, 2-in-1 shower gel and shampoo		<b>Packaging</b> <b>Article NO.</b> 1400 ml bag-in-box    1737	High quality, environmentally friendly, skin-friendly, hypoallergenic, 2-in-1 shower gel and shampoo. Lightly scented, colour and paraben free. Nordic Swan eco-labelled. Highly recommended for people with sensitive skin, children and elderly, sports facilities, swimming pools, hotels, etc.
<b>3-in-1 Hair &amp; Body</b>  3-in-1 shower gel, shampoo and conditioner with fresh, fruity scent		<b>Packaging</b> <b>Article NO.</b> 1400 ml bag-in-box    1504	Environmentally friendly 3-in-1 shower gel, shampoo and conditioner with a fresh, fruity scent. Highly foaming and versatile shower gel that leaves skin and hair silky smooth. Contains conditioning ingredients that leave hair anti-static, soft and shiny. Colour and paraben free.

# Disinfectors - Hand disinfectants

Hands are the biggest source of infection spread and there is a clear correlation between lack of hand hygiene and increased risk of infection. Good and proper hand hygiene significantly reduces this risk. Plum hand disinfection products are alcohol-based and contain 85% ethanol.

They are denatured with IPA and contain glycerine, which prevents the skin from drying out. Hand disinfectants should be applied on clean and dry hands, and the hands should be wet for 30 seconds for optimum effect. For surgical hand disinfection, keep your hands wet for 2 minutes.

All Plum hand disinfection products comply with the National Infection Hygiene Guidelines (NIR), are approved under applicable legislation and are assessed as suitable by the Central Unit for Infection Hygiene (CEI).

## Hand disinfectants

<b>Disinfectant</b> <b>85% gel</b>  Hygienic hand disinfectant gel		<b>Packaging</b> 120 ml bottle 500 ml pump 600 ml pump 1000 ml bag 1000 ml bag-in-box	<b>Article NO.</b> 3959 3949 3951 3766 3963	85% ethanol-based disinfectant gel containing 6% IPA. Bactericidal, yeasticidal, selective virucidal (norovirus) hand sanitizer gel, providing reliable protection against infections. It nourishes the skin without drying it out. The product meets European standards (EN14476, EN1500). Dermatologically tested.  <b>Dispenser:</b> Dispenso, CombiPlum, MultiPlum
<b>Disinfectant</b> <b>85% liquid</b>  Hygienic hand disinfectant liquid		<b>Packaging</b> 1000 ml bag 5 l can	<b>Article NO.</b> 3855 3813	85% ethanol-based disinfectant liquid containing 6% IPA. Bactericidal, yeasticidal, selective virucidal (norovirus) hand sanitizer gel, providing reliable protection against infections. It nourishes the skin without drying it out. The product meets European standards (EN14476, EN1500). Dermatologically tested.  <b>Dispenser:</b> CombiPlum, SafePoint+

Biocides must be used responsibly. Always read the label and product information before use.

# Disinfectors - Surface disinfectants

Good hygiene and regular cleaning and disinfection of surfaces and equipment will prevent and reduce the spread of infections. Every surface is different and cannot tolerate the same type of disinfectant. Plum offers different types of surface cleaners and disinfectants in the form of wet wipes. Recommendations by NIR and CEI suggests, that cleaning and disinfection should be carried out as two separate procedures.

First, clean the surface and wipe dry. When disinfecting, the treated surface should not be wiped dry, but kept wet until the minimum indicated time on the product has elapsed. Gloves conforming to EN 374 are recommended for hand protection when disinfecting surfaces.

Simply take a wipe from the pack, wipe, and dispose. Easy! The pre-moistened disposable cloths contain the exact amount of liquid and chemical dosage to achieve the greatest effect. This means they are ready for use straight from the pack. The cloths are sealed in airtight packs with a convenient, resealable function that ensures that they do not dry out. The wipes help prevent the spread of infection - simply, quickly and safely.

# Hand cleansers

We have developed a range of hand cleansers that effectively remove all kinds of grime. The products contain corn cob granules, which act as a natural and biodegradable abrasive.

All our hand cleaning products also contain glycerine, which replenishes moisture and prevents skin from drying out. Keep in mind that these products should be used on wet hands.

## Hand cleansers

<b>Super Plum</b> Hand cleanser for light dirts		<b>MEDIUM</b>	<b>Packaging</b> 250 ml tube 1400 ml bag-in-box	<b>Article NO.</b> 1015 1018	Hand cleaning paste made from vegetable oils, without perfume, colouring or solvents. Recommended for use on dry hands.  <b>Dispenser:</b> MultiPlum, StandardPlum

# Skin care after work

We recommend the use of a regenerating cream after each work session. It regenerates the skin that has been exposed to stress during daily work. It helps to restore the ideal moisture and hydration balance. Regular use will keep the skin smooth and soft and help to maintain its natural defences.

If you wash your hands often or work in cold or damp conditions, apply a regenerating cream at the end of the day to promote natural regeneration.

## After-work skin creams

<h3>Handy Plus</h3> <p>(Normal skin)</p> <p>Lightly scented conditioning cream with regenerative and protective effect</p>		<table><tr><th>Packaging</th><th>Article NO.</th></tr><tr><td>50 ml tube</td><td>2902</td></tr><tr><td>200 ml tube</td><td>2901</td></tr><tr><td>700 ml bag-in-box</td><td>2903</td></tr></table>	Packaging	Article NO.	50 ml tube	2902	200 ml tube	2901	700 ml bag-in-box	2903	<p>Conditioning and skin care cream with a protective effect. It is recommended after work and in the evening to regenerate the skin of the hands. The skin of working people can only regenerate its natural protective function at night and during breaks in work, as it is exposed to stress during work. At the end of the working day, it is important to use a nourishing skin cream that helps to restore the skin's natural moisture and oil balance.</p> <p><b>Dispenser:</b> MultiPlum, StandardPlum</p>

# Dispensers

Good hygiene requires more than just good products. The products also need to be easy to use, easily accessible and located in the right places. This can be ensured with our flexible dispenser solutions. Dispensers make it easy to establish good habits and ensure a high standard of hygiene in your working life. Our dispensers are all hygienic and easy to refill and clean.

NIR recommends using wall-mounted, touch-free or elbow operated dispensers.

The precise dosage of the product ensures that our dispensers are particularly economical to use, as the rate of wasting can be significantly reduced. There is no wastage, no unnecessary dripping and the packaging is completely emptied.

<b>Standard Plum</b>  Lockable, impact-resistant dispenser for bag-in-box products		<b>Type</b> Grey for bag-in-box	<b>Article NO.</b> 4215	Economical and hygienic dispenser with black transparent cover. # SOAP IN-A-BOX

## OUTSTANDING DESIGN

Clean, modern Scandinavian design without corners and edges. The dispenser blends in effectively and is an integral part of the overall look of the room and bathroom. Outstanding brand quality, both the dispensers and the cosmetic refills are designed and manufactured in Denmark.

## SIMPLE, FLEXIBLE FIXING

The dispenser fits perfectly to all standard hole punching devices, e.g. ADA press+wash, ADA care, ILLI 1, Dove etc. Drill-free, time and effort saving, easy to install with screws or glue!

## THEFT PROTECTION WITHOUT KEYS

Simple and safe to use.

## IMPACT AND SCRATCH RESISTANT

Using the best materials and techniques to guarantee long life and appearance, even under intense use.

## ECONOMICAL USE

Thanks to the dispensing system, you can achieve optimal consumption: 2 ml per dose, with one refill for approximately 225 uses.

## EQDERMA BRAND COSMETICS

Ph-neutral, unisex, economical. The Nordic Swan eco-label guarantees the best ingredients and a mild fragrance!

## 100% HIGENIC

The refills are completely sealed and airtight, so the risk of cross-contamination with air, water, water vapour or cleaning products is completely eliminated with this dispensing technology.

## SIGNIFICANT WASTE REDUCTION

Refills can be emptied to the last drop, no residue. A fully emptied foil bag with dispensing stem weighs only 12 g!

# Hand hygiene in 3 steps

If you use hand hygiene products from a dispenser, the precise amount measured by the device will ensure that you significantly reduce excess consumption. Our hand hygiene products are supplied in a range of dispensable packs to reduce the frequency of refills.

## Step 1: Protect your skin with a pre-work cream

Their use will help prepare the skin to protect it from various stresses during work. They prevent dirt from penetrating the skin, so that less and milder cleansing products are needed for proper cleaning.

## Step 2: Wash your hands regularly

It's important to choose the right cleaning product based on the type of soiling to avoid unnecessary water and detergent use. Frequent hand washing or disinfecting can put a lot of strain on the skin of the hands, so it is important to choose a cleanser and disinfectant that is gentle on the skin during use and does not damage it, unlike most cleansers and disinfectants on the market. The use of a pre-work product will significantly increase the effectiveness of cleaning.

## Step 3: Regenerate your tired hands skin after work

A proper skin care product will nourish and regenerate „tired“ hands that have been stressed during the day's work. It helps to restore the ideal oil and water balance. Regular use of a hand cream will leave your skin smooth and soft to the touch, even after intense work.

### Hand cleaning

Wash your hands thoroughly with water and mild soap or hand cleansers to ensure they are completely clean. You should wash your hands when they are dirty, after visiting the toilet, before cooking or handling food, and before eating.

### Hand disinfection

Use hand disinfectant whenever you do not have the opportunity to wash your hands. Soap and hand disinfection combined is a very effective way of avoiding the spread of bacteria and viruses.

### Skin care

Regularly apply a good and restorative skin care cream, preferably both before, during and after work. Healthy and supple skin prevents skin problems and eases the cleaning of the skin after work.
